Challenge & goals

The main reason for the search for a new system was the increasing workload for the administration of customer orders and for the control of the production. The company was looking for a suitable business software solution that would reduce the amount of work involved.

The solution - SAP Business One

With SAP Business One as a complete ERP software solution for mid-sized companies and SIGMA Software und Consulting GmbH as a project partner, they found what they were looking for. The project is scheduled to start at the end of August 2017. We look forward to a successful implementation and welcome fiberware to our SAP Business One user family.

This is what our customer says...

„The time and effort required to manage our customer orders was just too high. So we were mainly looking to improve order management, and found a complete solution in SAP Business One.“

Dr. Georg Kuka, owner of fiberware GmbH
