### About SIGMA

The SIGMA Chemnitz GmbH parent company is an experienced system house and has been offering a wide range of professional services in the fields of information technology, management and organization since 1990. The group of companies has had ERP experience since 1993. SIGMA Software und Consulting GmbH has been maintaining an intensive partnership with SAP in the field of medium-sized business solutions since 2007. All our consultants, developers and sales are certified by SAP and are regularly attended to further training courses. We love SAP Business One!

### About Getriebebau

Getriebebau Nossen GmbH & Co. KG is engaged in the development and production of industrial gearboxes and various types of drive components such as clutches. In addition, the company offers a manufacturer-independent on-site customer service, gearbox diagnostics and the and repair of mechanical drive technology.

## Getriebebau Nossen relies on SAP Business One HANA

 [www.getriebebau-nossen.de](http://www.getriebebau-nossen.de)

### Initial situation

The previous IT infrastructure of Getriebebau Nossen GmbH & Co. KG consisted of various isolated applications that made it difficult to exchange data with each other. To increase the efficiency of the company's processes, the company was looking for an integrated, holistic ERP software.

### Challenges

The ERP system to be used should be able to guarantee exact inventory tracking, taking batches into account, enable seamless traceability across all production stages, handle purchasing completely in the best case scenario and offer specification maintenance (including certificates for suppliers and products).

### Implementation of the ERP project

Getriebebau Nossen GmbH & Co. KG decided to use SAP Business One HANA both at its sister company DREMA Maschinenbau GmbH, located in Magdeburg, and in its own company. The IT infrastructure required for this (HANA server) was obtained from the IT infrastructure department of the SIGMA Chemnitz parent company. In the future, SAP Business One will be used to manage all company processes, especially in the areas of production, warehouse management / materials management, purchasing, sales and distribution, and financial accounting.

For a paperless overview of all production-relevant operating data, the SAP Business One AddOn SIGMA BDE, developed by SIGMA Chemnitz, will also be used. Another advantage is the CAD interface between Solid Works and SAP Business One.

## *This is what our customer says...*

*„SAP Business One in connection with the BDE AddOn and the SOLID Works interface enables to consistently map and make our business processes transparent - an all in one ERP software.“*

*Marcel Richter, Managing Director of Getriebebau Nossen GmbH & Co. KG*
