About SIGMA

As a renowned system house group, the SIGMA Group acts as a system integrator and partner of renowned providers in the IT sector. The more than 80 employees of the group form a competent team at the locations Chemnitz and Dresden. With know-how, competence and more than 30 years of experience we offer our customers reliable and powerful IT solutions. The group has ERP experience since 1993, and SIGMA Software und Consulting GmbH has maintained an intensive partnership with SAP in the area of mid-market solutions since 2007. All of our consultants, developers and sales staff are certified by SAP and regularly undergo further training. We love SAP Business One!

About MC-Bauchemie

MC-Bauchemie is a leading international supplier of construction chemical products and technologies with headquarters in Bottrop. For over 60 years, the family-owned company has been developing innovative solutions for concrete toughening and the maintenance of buildings. MC-Bauchemie is represented in more than 40 countries worldwide with over 3,000 employees.

Efficient networking worldwide: MC-Bauchemie optimizes ERP structure with SIGMA

 www.mc-bauchemie.com

MC-Bauchemie relies on SIGMA for global ERP integration

MC-Bauchemie Müller GmbH & Co. KG, a global leader in construction chemicals, has chosen SIGMA as its central SAP Business One partner to modernize its ERP structure and create central integrations.

While some international subsidiaries are already successfully using SAP Business One, a different ERP system is being used in Germany and other countries. SIGMA assumes central responsibility for the entire SAP Business One infrastructure and its integration with the existing systems. The automated data exchange, made possible by the SIGMA EDI cockpit, ensures optimized processes, simplified workflows and the minimization of error sources at all global locations.

Solutions for a networked ERP structure

- 1. setting up a group client for SAP Business One:** SIGMA creates a central client structure to standardize the management and coordination of the international locations. This simplifies data management and supports the central control of MC-Bauchemie.
- 2. development of a customized interface:** SIGMA develops an interface that enables smooth data exchange between SAP Business One and the other existing ERP system and thus creates transparency between the systems.
- 3. intercompany solution for foreign companies:** In countries where SAP Business One has already been implemented, SIGMA is implementing a comprehensive intercompany solution. This links the international locations, promotes process harmonization and improves data exchange between the companies.

This collaboration with SIGMA creates a networked ERP infrastructure for MC-Bauchemie and optimizes cross-national business processes. Thanks to the central control and modern integration solutions from SIGMA, MC-Bauchemie Müller is ideally equipped for future growth.
