About SIGMA

The SIGMA Chemnitz GmbH parent company is an experienced system house with over 80 employees at the Chemnitz and Dresden sites and has been offering a wide range of professional services in the fields of information technology, management and organization since 1990. The group of companies has had ERP experience since 1993.

SIGMA Software und Consulting GmbH has been maintaining an intensive partnership with SAP in the field of medium-sized business solutions since 2007.

All our consultants, developers and sales staff are certified by SAP and continuously undergo extensive training. We love SAP Business One!

Europack24 GmbH

Europack24 GmbH is a trading and service company with its main focus on packaging materials and packaging technology. More than 10 years ago, the company began selling packaging materials exclusively as an online business, while other suppliers only concentrate on the delivery of packaging products. Today customers receive expert advice and support individually on site throughout Germany.

How Europack24 works with SAP Business One

Challenge & Goals

Introduction of an integrated ERP solution that provides end-to-end support for company-relevant processes such as master data maintenance, purchasing, sales, warehouse management, material requirements planning, project management and financial accounting, thus forming the base for sustainable growth.

The solution

With SAP Business One, an ERP solution for SMEs was selected that can be used to cost-effectively manage the entire company - from finance to procurement, warehouse management and sales.

In financial accounting, SAP Business One automates core accounting processes and supports payment reconciliation through integrated bank statement processing. The financial processes are seamlessly linked to the core processes in real time.

Material requirements planning generates recommendations for purchase orders, taking into account customer orders and/or forecast values as well as supplier orders and minimum stocks. Here, the recommendations for different articles and dates can be combined in one purchase order for one supplier.

SAP Business One controls the entire sales process and, thanks to the flexible integration, imports orders from the web shop. The eBay-connector synchronises items in stock between SAP Business One and eBay and automatically creates a sales order when the item is sold via eBay.

The implementation was quick and easy to complete and went live after only a short time. Both master data of business partners and articles were transferred from the old system.

What our client says...

„SAP Business One provides us with up-to-date information at all times, giving us a transparent insight into our business and processes.“

Dirk Broda, Managing Director, Europack24 GmbH
